- 63%

Wardha

## SKILLS

React Js

JavaScript

Css

Html

Java

Vite

Github

## PERSONAL PROJECTS

### Portfolio Functionality

- Using React Router Dom , Third party Library
- The goal of using react router to navigate to the other parts of the application without reloading the webpage.

### Password Genrator

- The primary goal of this project is to know how Hooks use ( useCallback,useEffect,useRef,useState)
- Hooks that return memorized callback function, use to hold some information that isn't used for rendering , that lets you add a state variable to your component

### ToDoList

- It is simple Todo , Done by using Context Api , A state management solution in react that helps to pass data between components in an organized way.
- Using Local Storage, LocalStorage is a web storage object to store the data on the user's computer locally, by using this the saved data will not be disappear during a reload or reopening of the webpage.

## HIGHLIGHTS:

One day training program in KEC International Training Center

Conducted seminars, worked for department as a vice-president of mechanical department.
